

## Safety Precautions

1. Do not play game without a chaperone or student supervising.
2. Do not touch anything except your board piece.
3. Have to be 10+ years of age, and over 3 feet tall.
4. Patiently listen to rules and be cooperative.
5. Have a dandy time!

## Chemical Safety Precautions

1. **Aluminum + Copper(II)Chloride(SRP)** - Do not touch or get close to this reaction because being a reaction that changes the substance, it will burn you and be very toxic. (We know from experience)
2. **Calcium Carbonate + Hydrochloric Acid(POG)** - This reaction will cause fizzing and result in a balloon getting popped, so don't put your face or hands near it unless you want acid on your skin!
3. **Zinc + Hydrochloric Acid(SRP)** - During this reaction, the zinc will dissolve when placed in hydrochloric acid, so don't touch it.
4. **Potassium Bromate + Silver Nitrate(DRP)** - When combined, a color or solid will form. Although this isn't containing acid, please keep a distance and let the game makers do their job.
